NVG USER COURSE DESCRIPTION

This course addresses the entire spectrum of Night Vision Training and use from the LEO perspective. Classroom instruction will cover the Night Vision System and why all components are critical. In addition, special considerations for LE during missions with dry practical runs for clearing, as well as recommended policy and practices.

Range drills will expose weaknesses and strengths of using night vision for slow clears to hostage rescue and will cover the following:

- Comparative contrast between current NV and laser systems
- Understanding of the importance of power as it relates to photonic barriers
- Zeroing procedures
- 12 engagements of low and high percentage threat zones
- 12 to white light transitions
- How engagement and application under NVG's varies when shooting around intermediate barriers and barricades

Students will be able to understand the importance of every facet of night vision as a system and articulate the appropriate requirements to their chain of command.

Officers will have a better understanding of the advantages and safety of using Night Vision for Domestic Police operations.

Length – 3 days

Tuition - \$550 Contact info@tap-rack.com to register or for more information.
